

DAILY PARENT SCREENING

Student's name _____

Date _____

We learn more about COVID-19 every day, and as more information becomes available, we will continue to update and share information. As our knowledge and understanding of COVID-19 evolves, things may change. However, based on the best available evidence at this time:

- **The CDC recommends that parents or caregivers should be strongly encouraged to monitor their children for signs of infectious illness every day.**
- **Students who are sick or at high risk for infection should not attend school in person.**

Parents/guardians, please complete this short check each morning before your child leaves for school.

SECTION 1: Symptoms

If your child has any of the following symptoms, that indicates a possible illness that may decrease their ability to learn and also put them at risk for spreading illness to others. Please check your child for these symptoms:

Temperature 100.4° F or higher

Sore throat

Diarrhea, vomiting, or abdominal pain

New, uncontrolled cough that causes difficulty breathing (for students with chronic allergic/asthmatic cough, a change in their cough from baseline)

New onset of severe headache, especially with a fever

If you have checked any of the boxes above, please keep your child home from school today and contact your healthcare provider. We ask that you follow your healthcare provider's recommendation and report this information to your child's clinician at our school.

SECTION 2: Close Contact and Potential Exposure

In order to minimize risk, it is best to limit the people you and your family come into contact with. Each morning, assess if your child:

Had close contact (within 6 feet for at least 15 minutes) with a person with confirmed COVID-19, or who is currently quarantined due to suspected COVID-19 infection or travel to/from a quarantined state.

Traveled to or from an area where the local, tribal, territorial, or state health department is reporting large numbers of COVID-19 cases and identified on the Governor's list of Mandatory Travel Quarantine States.

If you have checked either box, please contact your child's clinician to report this information. The Neil Hellman School requires that individuals who may have been exposed to the COVID-19 virus contact the Department of Health and follow the department's recommendations. This must be reported to the school so that we can plan for distance learning, if necessary. This could mean the student must complete quarantine and remain symptom-free before returning to in-person learning. The discharge of an individual from quarantine and return to school will be conducted in coordination with the local health department.

We thank you for your cooperation and assistance in keeping the Neil Hellman School a safe place for all of our students, teachers, and staff.
